User manual

See user manual (in Norwegian).

- Only units with enough responses (at least 8 answers) are available.
- You will find pages with responses for your unit, where you can compare in the tabs for all other respondents in the survey than those at your unit.
- You can read the report interactively divided into chapters in the menu on the left side (mobile: hamburger icon). This will give you hyperlinks, figures with additional information and the ability to refer to a specific section as a URL.
- On the right under the table of contents you will find static DOCXs and PDFs for download.
- Username and password for unit pages have been sent to the unit's contact person (school principal or school owner). Contact them if you need access to your unit.
